

Solution Dilution SOP

LAB SOP | Version 2.1 | Effective 2026-08-01 | DEMO DOCUMENT

1. Confirm inputs

- Verify stock concentration and target concentration.
- Use the same concentration unit for C1 and C2.

2. Calculate

- Calculate V1 using $C1 \times V1 = C2 \times V2$.
- Confirm that the target concentration does not exceed the stock.

3. Prepare and label

- Add stock to a suitable vessel, then add diluent.
- Mix thoroughly and label with concentration, date, and operator.
